## Activity Overview

### Air quality

#### Air Permit - 12300070

Magellan Pipeline Co LP - St Paul

Status: Active

If a facility generates air pollutants during operation of its business, it may need an air quality permit, which helps to minimize these pollutants by establishing limits, operating requirements and monitoring.

#### Events

Event	Effective Start	Effective End
Administrative Amendment	12/29/2008	
Total Facility Permit Reiss.	01/04/2006	12/28/2008
Administrative Amendment	03/31/2005	01/03/2006
Total Facility Permit	01/12/1998	03/30/2005

#### Inspections

Inspection Type	Inspection Date
Full Compliance Evaluation	09/09/14
Full Compliance Evaluation	03/15/12

### Hazardous waste

### Hazardous Waste, Small to Minimal QG - MND000685768

Magellan Pipeline Co LP - Roseville

Status: Active

Hazardous waste includes substances that are corrosive, explosive, toxic and/or fire hazards. Small to minimal quantity generators produce 0 - 1,000 kilograms of hazardous waste per calendar month.

---

#### Inspections

Inspection Type	Inspection Date
Other	03/25/93
Compliance Schedule Evaluation for CA	10/10/83
Compliance Evaluation Inspection	07/19/83

## Investigation and cleanup

### CERCLIS Site - MND000685768

Williams Pipe Line Co - 1

Status: Inactive

A Comprehensive Environmental Response, Compensation and Liability Information System site is a place suspected of being contaminated. Each site is investigated to determine if it needs to be elevated to a state/federal Superfund list.

---

#### Links to Additional Data Sources

- [EPA CERCLIS Project Data - 0503683](#)

---

### State Assessment Site - SA8431

Williams Pipe Line Co (Roseville)

Status: Inactive

State Assessment sites are places the MPCA has investigated due to suspected contamination. They are assessed to determine if they pose a risk to human health or the environment. If so, they are referred to a cleanup program.

---

#### Links to Additional Data Sources

---

### Unpermitted Dump Site - REM05405

Williams Pipe Line Co - 1

Status: Inactive

Unpermitted dumps are landfills that were never permitted. Generally, they existed before the creation of the MPCA. They were not restricted to any type of waste but were often farm or municipal disposal sites that accepted household waste.

---

## Tanks and leaks

### Leak Site - 18401

Magellan Midstream Partners LP

Status: Active

Leak sites are locations where a release of petroleum products has occurred from a tank system. Leak sites can occur from aboveground or underground tank systems as well as from spills at tank facilities.

---

#### Links to Additional Data Sources

- [Leak Data - 18401](#)

---

### Leak Site - 465

Magellan Midstream Ptnrs Roseville Trml

Status: Inactive

Leak sites are locations where a release of petroleum products has occurred from a tank system. Leak sites can occur from aboveground or underground tank systems as well as from spills at tank facilities.
